

# STRATEGIC PLAN 2023-2027

# Vision

Independent. Reliable. Advocating for a sustainable future.

## Mission

Empowering our Local Landcare networks, coordinators and volunteers to support, communicate, educate, and nurture sustainability across our environment, encompassing both urban, natural and agricultural landscapes

### **OUR PRIORITIES**

- Be Landcare's Voice in Central
   Tablelands: Represent and advocate for our members' interests and needs in the region.
- Secure and Manage Regional Funding:
   Obtain and distribute regional funding fairly to expand Landcare activities and projects in Central Tablelands.
- Enhance Communications: Promote our regional communications to support Local Landcare coordinators and their communities.
- Legacy and Succession: Maintain
   Landcare's enduring presence in the region
   and plan for future leadership to continue
   our mission effectively.
- Lead Regional Projects: Develop and support impactful Landcare initiatives to benefit the environment and community.

# OUR VALUES

Environmental Stewardship

Collaboration

Future Focused

Inclusion

Success

Our Network recognises that
Aboriginal people are the original
landcarers of Australia, and we are
committed to engaging with our local
Aboriginal residents and
communities.

# ABOUT US

The Central Tablelands Regional Landcare Network (CTRLN) is located in central NSW and covers an area of approximately 31,365 km2. We represent a dynamic collaboration of our five local networks: Watershed Landcare, Central Tablelands Local Landcare, Mid Lachlan Landcare, Little River Landcare Group, and the Lithgow Oberon Landcare Association.

The CTRLN places a strong emphasis on collaboration and partnership-building. We work closely with fellow Landcare and community groups, local farmers and landholders, government agencies and private industry within our region. This ensures that our initiatives are characterised by cooperation. Our commitment to collaborative engagement allows us to maximise the positive impact of our work and create sustainable outcomes for the wider community and our environment.

Our region is abundant in natural resources, including national parks, culturally significant sites and hosts a rich diversity of native flora and fauna. The Central Tablelands Regional Landcare Network falls predominantly within Wiradjuri Aboriginal country. Agriculturally, the region's diversity adds complexity to its natural resource management. Grazing is the most significant land use, followed by irrigated farming, broad-acre crops, and horticultural ventures, including fruit and vegetable cultivation and viticulture.
